Everything you need to write better research.

Citable combines AI with collaborative LaTeX editing to help researchers write better papers.

Citable isn't just another research tool, it's a hub that connects seamlessly with your entire research ecosystem.

From reference management in Zotero to version control in GitHub, and collaborative writing in Notion, our AI-powered research assistant works harmoniously with the tools researchers already love.

Import citations directly from your preferred platforms, organize your research notes and findings, and maintain perfect synchronization across your research workflow. From paper discovery on arXiv to data analysis in Jupyter, Citable adapts to your research stack, making citation management a natural extension of your research process.

LOGOTYPE

1.1 Logo Construction

Logo construction is a design ordering system tool created by using shapes to create geometric harmony in a logo or helpful to understand the construction for the reconstruction of the logo.

Our logo is composed of two key elements: a symbolic icon and a modern typographic wordmark.

1.1 Logo Construction

The icon is carefully designed to embody the essence of the product. It is constructed from aligned book shapes, symbolizing knowledge and structure, with a cursor placed on top to represent interaction and navigation. A book-tag detail integrated into the cursor reinforces the concept of selection, learning, and digital engagement.

The symbolic icon

1.2 Logo variations

Primary Logo

The main and most commonly used version of the logo. It is used in most communications.

1.2 Logo variations

Vertical logo Version

A compact, vertically aligned version for narrow or square spaces.

1.2 Logo variations

Icon-Only Version

The graphic icon separated from the wordmark. It is used for favicons, app icons, or when space is very limited.

1.3 Logo clear space

To maintain the integrity and visual impact of the logo, a minimum clear space must be maintained around it at all times. This space ensures that the logo remains legible and free from visual distractions. The required clear space is defined by the icon height (X). This measurement should be applied to all sides of the logo. No text, imagery, or graphic elements should appear within this protected area.

1.4 Reversed and single color

The reversed logo is designed for use on dark or colored backgrounds where the standard logo would not maintain adequate contrast or visibility. The single-color logo is a simplified version of the logo, used when color is limited such as in black-and-white printing, embossing, engraving, or minimal designs. It may appear in black, white, or another approved brand color depending on the background and context.

Use this version only when the full-color logo is not practical or appropriate.

1.5 Logo restrictions

To preserve the integrity and consistency of the brand identity, the logo must never be altered or misused. The following examples illustrate unacceptable uses of the logo :

Rotate or flip the logo in any direction

Distort, stretch, or compress the logo

Replace the typeface or rearrange the logo elements

Change the logo colors

Add shadows, gradients, or other effects

Modify or remove any part of the logo

BRAND COLOR

2.1 Mental model

Editor Panel / Mental model: Creation / Writing / Editing

User mindset: Writing - Creating - Editing - Producing content
Goal for user: Produce content, focus on creating and modifying text.
Color role: Strong, confident color that signals active creation.

Bibliography Panel / Mental model: Consultation / Reading / Reference

User mindset: Searching - Reading - Checking sources - Referencing
Goal for user: Find, read, and reference information.
Color role: Calm, neutral color that signals knowledge, calmness, reliability.

To-Do List Panel / Mental model: Action / Task Management

User mindset: Planning - Executing - Tracking progress
Goal for user: Plan, track, and complete tasks efficiently.
Color role: Energetic, motivating color that signals action and progress.

The goal changes

The attention type changes

The interaction pattern changes

2.2 Color UX insight

Each color signals a different mindset, helping users instantly know what they are doing without reading labels. All three colors are harmonized (similar saturation/lightness) so your interface feels professional and cohesive, not chaotic.

Éditeur	Active / Focus / Minimalist / Professional
----------------	--

Bibliography	Calm / Knowledge
---------------------	------------------

To-Do List	Energetic / Action / Happy
-------------------	----------------------------

2.3 Primary Color Palette

The Primary Color Palette includes the main colors that represent the core identity of the brand. These colors should dominate all branded materials and be used consistently to ensure a strong, recognizable visual presence.

2.3 Primary Color Palette / Background (Dark,Light)

The Primary Color Palette includes the main colors that represent the core identity of the brand. These colors should dominate all branded materials and be used consistently to ensure a strong, recognizable visual presence.

2.4 Secondary Color Palette : GREEN

The Secondary Color Palette is used to support and complement the primary colors. These colors add flexibility, visual interest, and variety to layouts without overpowering the primary palette.

2.4 Secondary Color Palette : PURPULE

The Secondary Color Palette is used to support and complement the primary colors. These colors add flexibility, visual interest, and variety to layouts without overpowering the primary palette.

2.4 Secondary Color Palette : BLUE

The Secondary Color Palette is used to support and complement the primary colors. These colors add flexibility, visual interest, and variety to layouts without overpowering the primary palette.

2.4 Secondary Color Palette : RED

The Secondary Color Palette is used to support and complement the primary colors. These colors add flexibility, visual interest, and variety to layouts without overpowering the primary palette.

2.4 Secondary Color Palette : ORANGE

The Secondary Color Palette is used to support and complement the primary colors. These colors add flexibility, visual interest, and variety to layouts without overpowering the primary palette.

TYPOGRAPHY

3.1 Primary Typeface

Typography is a key element of our brand identity. It helps create a cohesive and recognizable tone across all communications.

Our typographic system consists of:

A primary display typeface used exclusively in the logo

A supporting typeface used for all other text in digital and print materials

Primary Typeface (Logo Only): Goodly

The Goodly typeface is used exclusively for the logo. It gives the brand a unique and recognizable personality with a modern, distinctive look.

Do not use Goodly for any text outside of the logo.

It is reserved for brand recognition and must not appear in headlines, body text, or other design elements.

abcdefghijklmnopqrstuvwxyz

a0123456789.,,:!

3.2 Supporting Typeface

Supporting Typeface: Inter

Inter is the official supporting typeface for all brand communications, including:

- Headings and subheadings
- Body copy and paragraphs
- Captions and labels
- Print and digital content

Inter offers clarity, elegance, and versatility. It complements the Goodly logo by maintaining a minimalist and modern aesthetic.

Use a clear typographic hierarchy (e.g., different weights and sizes) to organize content and ensure readability.
